Mr. Soule further explained the need for this loader and shared his opinion that the loader should be replaced rather than invest a large amount of money into such an old machine. Mr. Davis reviewed the consideration prices that Mr. Soule had obtained. Funding options, salvage of the 1989 loader, the Public Works Department's vehicle replacement schedule, and the Unassigned Fund Balance (UFB) were discussed, with Mr. Davis pointing out the continuing downtown drainage problems, funding for which should come from the UFB if an emergency situation arises.

He also passed around copies of an article from today's Morning Sentinel regarding this matter. Mr. Davis explained the two MaineDOT paving options and the effect on the Town because the road falls within the Urban Compact Area and is therefore the Town's maintenance responsibility. Mr. Davis recommended having MaineDOT wait until after the gas pipeline construction project is complete to pave the Wilton Road, and in the meantime budget additional funds for maintenance. It was the consensus of the Selectmen to ask MaineDOT to postpone paving of the Wilton Road until after the gas pipeline construction project is complete.

To Consider an Expenditure of funds from the Municipal Building Reserve Account for the Purchase and Installation of a Heat Pump

Richard Davis explained and reviewed the research that has been done and the quotes that have been obtained. Mr. Davis recommended that this project be postponed and budgeted for next year, and explained the potential funding problems due to the unknown total cost of the front entryway roof replacement until the existing roof is removed, and possible better energy efficiency by replacing the existing ductless air conditioner with a multi-head heat pump unit in order to add three more units in different areas of the building in addition to the Conference Room. Mr. Davis stated that research is also taking place regarding the increase in efficiency of the current heating system by adding more fin work to the baseboard registers and readjustment of the Tekmar boiler control. Ryan Morgan pointed out that although Efficiency Maine's current rebate program is only for a single-head unit they are working toward a multi-head unit rebate program, hopefully by next year, so a multi-head unit would have to be totally budgeted for.

Richard Davis gave numerous approaches to naming the park, ie. the Selectmen could name it, it could be named after an individual or organization, or it could be opened up to the public. The Selectmen discussed those options and others. Resident Nancy Porter explained research that she distributed regarding the history of the lot and, in conjunction with that history, her suggestion to name the park "Norton Flat School House Park". Mrs. Porter also suggested that a sign acknowledging the benefactor be displayed in the park, as well as a sign similar to the downtown walking tour signs in an effort to continue sharing the Town's history. It was the consensus of the Selectmen to open the naming of the park up to the general public. Mr. Davis stated that the only request that Richard Bjorn has made thus far is for small plaques to be placed on the back of each of the four benches, which he is currently pricing. Mr. Davis suggested that a large plaque naming the benefactor and other pertinent information be purchased out of the Special Projects account and placed on the flat north side of the rock that has been located in the center of park. A dedication ceremony was discussed and the date to decide the name of the park was set for the Selectmen's September 9th meeting, with notification of the Selectmen's desire for public input to be sent to the media and posted on the Town's website.
